ZONES®

Zones Backup as a Service for M365

Reliable Data Protection with Zones Backup as a Service

BUSINESS CHALLENGES:

Managing and protecting data across on-premises, cloud, and hybrid environments presents significant challenges. From user errors to cyber threats, data loss risks are ever-present, often leading to costly downtime. Businesses require a robust, scalable, and compliant solution that aligns with their technology and budget needs while ensuring data recovery and business continuity.

SOLUTION OVERVIEW:

Zones Backup as a Service (BaaS) provides a comprehensive data protection solution tailored to meet business, technology, and cost requirements. Compatible across on-premises, cloud, hybrid environments, and O365/M365 setups, BaaS is a scalable, plug-and-play module that integrates seamlessly, allowing for quick onboarding of customer environments and enabling backups with minimal setup time. As a cloud-based solution, BaaS supports multi-site data replication for redundancy and offsite protection, along with flexible policies for backup frequency. and retention. Industry-compliant and secure, BaaS mitigates risks of user errors, hacking, and other disasters, helping businesses achieve required RTO (Recovery Time Objective) and RPO (Recovery Point Objective) standards.

DEMO OVERVIEW:

Our lab demonstration, powered by Veeam's advanced data protection platform, showcases seamless backup capabilities for both on-premises and cloud workloads.
